NIKON INTRODUCES NEW ANTI-FOG LENS CLOTH

As the leading brand of ophthalmic lenses, we strongly believe that, regardless of the circumstances, vision clarity should never be compromised. This is why we are proud to introduce the Nikon Anti-Fog Lens Cloth.

A lens cloth designed to prevent fog accumulation on lenses while wearing a face mask. The anti-fog formula will have an immediate effect on the lenses and it will last up to 12 hours before the next application.

The premium material help preserve the benefits of the Nikon coatings* and it will last for up to 12 months or 300 activations.

As a result, patients can confidently wear their eyewear (ophthalmic lenses or sun lenses) with their face masks without worrying about fogged lenses and blurry vision.

To place an order, contact your local Nikon customer service representative at 1-800-663-8654.

*Tested under normal wearing conditions
